Information Technology (IT)  
Solutions Brochure

Denysys Corporation delivers best-value services that federal, state and local organizations need to integrate, modernize and upgrade their information systems & business processes. Our senior-level IT Business Consultants, combined with our innovative tools and methods help organizations establish robust and more efficient business processes, quickly and effectively.

## Our Technical Capabilities

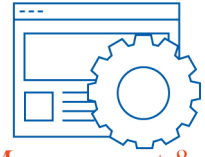

### Agile Development Services

Our IT developers use our unique agile development approach to deliver valuable software quickly & continuously so you can get fast and frequent feedback from your users

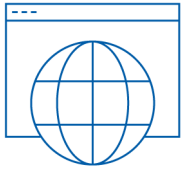

### Software Maintenance (Sustainment) Services

Our Technical Support team provides comprehensive technical support, maintenance and system enhancements that ensures the stability of your software applications and IT systems

### Case Management & BPM Software Implementation

We help organizations streamline their various business processes and increase productivity by implementing our refined & automated Case Management and BPM solutions into their business operations

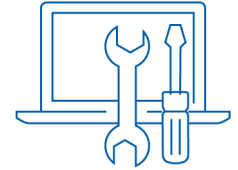

### Web Development Solutions

Our team focuses on delivering the industry's most innovative web development services that can greatly increase your market reach and are compatible with the latest devices

### Enterprise Resource Planning (ERP) Services

Our unique approach to ERP Services helps organizations streamline their various enterprise business processes, increases productivity and aids greatly in lowering costs

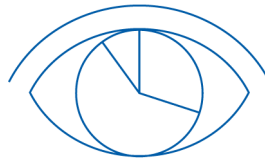

### Systems Integration Services

We help organizations overcome complex systems integration challenges by providing robust systems integration solutions & services that help minimize the complexity of changing technologies

### Helpdesk & Data Center Support Services

Our Help Desk Services are available 24x7x365 and our highly knowledgeable & qualified help desk technicians are continually ready to provide comprehensive IT support which allows you to focus your energies on your business rather than on troubleshooting and problem solving

### Data Analytic Solutions

Our experts identify recurring patterns, build sophisticated metrics, gather & compile crucial competitor business intelligence data and enable clients in unlocking hidden opportunities and insights that are essential for making important business decisions

### Cyber Security Services

Our team of cyber security experts provide 24x7x365 global threat monitoring, analysis and incident response which enables you to quickly detect, assess, and respond to advanced threats
